

Gillian Cochran
Final Project
Testing Report

I've successfully designed the visuals of the website while making them functional. I found pedal knobs and switches from another developer to use in my project and connected them to all my functionalities. I am still struggling with the delay aspect of my project. I can't seem to figure out the scope of it and how exactly to make it affect my MIDI output sounds. Another bug that I've had that is more minor is the fact that I can't figure out how to make the high and low harmonized voices coexist. I tried using an if `{*** && ***}` statement to allow them to be activated simultaneously, but to no avail.
